Summary

Software engineer and final-year Software Engineering student building Flutter mobile apps and React, TypeScript and Next.js web products, usually with the backend and data layer alongside them, plus Windows desktop software in C#/.NET. Fluent in Arabic and English.

Experience

LATI (Libyan Academy of Telecommunications and Informatics) Present
Libya

Freelance Mobile Application Developer 2025 – Present
UAB Shipping (Um Albehar Shipping) · Tripoli, Libya

- Designed and shipped a Flutter customer app for a Libyan freight company: sea and air orders from China, the UAE and Turkey, live-map tracking, cost estimates and push notifications.
- Modeled the relational database from the ground up, covering shipments, orders and catalog categories.
- Owned the product end to end with clean architecture per feature, using Riverpod, go_router, dio, Hive, flutter_map and Firebase Messaging.

Software Development Trainee 2026 · 1 month
Al-Madar Al-Jadid (Almadar Telecom) · Tripoli, Libya

- One-month training program at one of Libya's leading telecom operators, with hands-on professional software practice.

Projects

Travelyuk React, Vite, React Router, PHP, MySQL
Travel-agency platform and backend: group trips, flights, hotels and visas with cart-and-hold booking, refunds, a permissions-aware staff dashboard, support chat and white-label branding.

Meezan React, TypeScript, Tailwind CSS, Firebase Auth, Cloud Firestore
Personal management app for money, meals, workouts, goals and habits, with realtime subscriptions and transactional writes.

LATI Report Studio Next.js, TypeScript, Radix UI, ExcelJS, pptxgenjs, pdf-lib
Browser-based tool that turns a training-course folder into per-company PowerPoint and PDF reports.

Jabal Al Hadeed React 19, Vite, CSS Modules, PHP · jabal.tools
Marketing site for a Tripoli power-tools and building-materials supplier, with design tokens and responsive images.

Blood Bank App Flutter, Dart
Cross-platform app connecting blood donors with recipients: donor registration, blood-type search, donation requests and push notifications.

Point of Sale (POS) System C#, .NET, WPF
Windows desktop POS for sales processing, inventory and billing.

Skills

Mobile: Flutter, Dart, Riverpod, Hive, Kotlin Multiplatform (KMP), iOS & Android, REST APIs, local storage
Web: React, TypeScript, Next.js, JavaScript, Vite, Tailwind CSS, CSS Modules, Framer Motion, three.js, HTML, CSS
Backend: PHP, Laravel, RESTful API design, MySQL, SQLite, SQL, Firebase Auth, Cloud Firestore
Desktop: C#, .NET, WPF
Languages: Dart, TypeScript, JavaScript, PHP, C#, Java, C++
Tools: Git & GitHub, GitHub Actions, Figma (UI/UX), AI-assisted development (Claude Code), application security

Education

B.Sc. in Software Engineering Expected late 2026
College of Electronic Technology · Tripoli, Libya

LATI — Mobile Application Development Bootcamp
Backend development, UI/UX design (Figma), Kotlin Multiplatform (KMP), Flutter and application security
